Spirulina, young barley

The label can also contain a combination of several colors.

By color lightening we are able to achieve more color shades (within one color).

PANTONE colors are the closest equivalents to actual printed colors. Their display may differ depending on the type of monitor.

For the first order, we charge a one-time fee of CZK 1,500 (€60) for the production of a printing template for each specific color.

The minimum order for this technology is 15,000 labels.
